TWO-IN-ONE

TOOL CHEST AND PORTA CAB

The large drawers of a Porta Cab and the smaller drawers of a tool chest have been combined to make this the most versatile rolling work bench made. A heavy gauge of steel has been formed and welded into a streamlined and rugged cabinet. A single built in lock secures the HYDE-WAY front panel into place and can also be used to lock the center drawer when the rest of the Porta Cab is open. Blue and gray baked enamel add much to the beauty. The drawers slide freely on compound spill-proof rails with over-sized rails used on the lower, larger drawers. Two drawers have movable dividers and the top three drawers are lined with a green rayon flock to protect your fine tools and gauges. Model 250 comes standard with "Flying Saucer" type casters. This makes moving easy even on a rough uneven floor. Other styles of casters are also available. Set off with brightly plated hardware, the Model 250 is a showpiece.

Overall dimensions 18 x 26½ x 33

Shipping weight 110 pounds

Drawer dimensions 3 drawers 1¾ x 6½ x 16
2 drawers 1¾ x 21½ x 16

SPECIAL DELUXE TOOL CHEST

MODEL 100 SPECIAL DE LUXE TOOL CHEST

More drawers, more space, more tool box, that's the Model 100. Eleven free-sliding, non-spilling drawers for all of your tools. Seven drawers flock lined for fine gauges and tools. Three heavy, large drawers for wrenches, hammers and rough tools. And best of all, one drawer 3¾ x 11 x 6¼ that will hold any ¼" power drill on the market today. Two tone, sky blue and cole gray hammered finish that is baked on to make it grease and oil resistant. Lustrous, large hardware. A portable tote tray to carry your tools. Cabinet will lock securely with one built-in lock.

MODEL 400 HUOT TULDEX

MODEL 400 HUOT TULDEX (patents pending) is the most modern and advanced method of tool-indexing and care available today. The Model 400 HUOT TULDEX was designed specifically for the master mechanic who knows, appreciates and wishes to take the best of care of his valuable tools. An entirely new concept of tool location and protection is built right into the HUOT TULDEX. The mechanic owning a HUOT TULDEX is at all times able to say about his TULDEX, "a place for everything, and everything in its place." The modern mechanic, needing an ever increasing variety and quantity of tools to repair and maintain the highly complex automobile of today, is in many cases at a loss to store and locate his tools. The valuable time of skilled mechanics can be put to better and more profitable use, than hunting for misplaced or buried tools. Hundreds of hours are lost each year by every mechanic in his endless search for a misplaced tool. HUOT, America's leading manufacturer of "modern tool storage systems for modern tools", proudly presents the last word in its Model 400 TULDEX:

Model 400 TULDEX

Cabinet made of heavy reinforced 18 and 20 gauge steel. Finished in beautiful blue and grey hammerloid infra-red baked enamel. Grease proof.

The Model 400 TULDEX has six tool holding panels, made of light, strong perforated hardboard. Perforations are on one inch centers, hardboard is tempered on both sides. Inside of doors also have tool holding capacity. One drawer for extra large bulky items. Tool panels move in individual tracks on geared nylon bearings. These bearings have been subjected to laboratory test equivalent to ten years normal service, with no visible sign of wear. Bearings and gears were not lubricated during this test, as nylon is a self lubricating material.

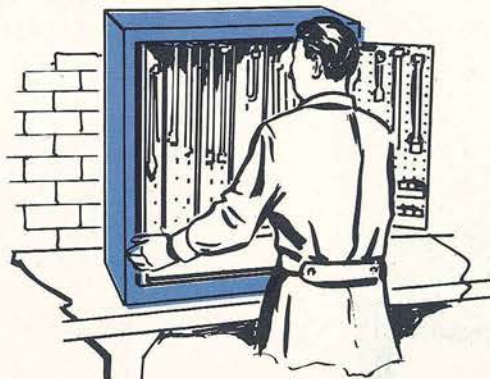

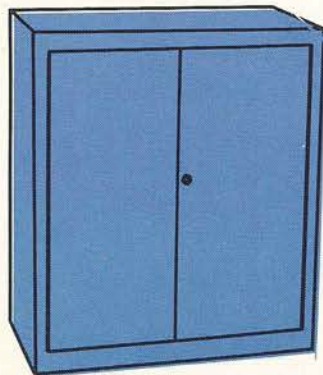

Doors operate and swing on same type gears and bearings as panels, moving completely out of the way when open. Doors equipped with built-in lock, locking at both top and bottom.

Model 400 TULDEX has over twenty-four square feet of tool storage area. Nearly double the largest drawer type tool chest available.

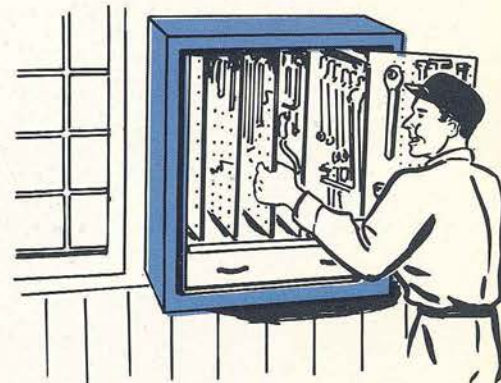

The TULDEX may be placed on bench; hung on the wall; or mounted on top of portable PORTA-CAB UNIT.

ECONOMY PORTA-CAB

Here is the perfect solution to the problem of making a tool chest and tools portable at the lowest cost. Now available, a really efficient, good looking, heavily built tool totter at rock bottom cost. Each shelf of the No. 270 is rigidly bolted into position using 12 bolts on each shelf. The shelves are also supported on each end with electrically welded brackets which allow the cabinet to be bolted in three directions making the unit twist and shakeproof. Equipped with the same high grade "Flying Saucer" castor as our Deluxe models, or may be supplied with regular type 4" rubber castors if specified. One handle supplied with each unit that may be mounted at either end. Finished in best grade of blue hammerlin baked-on grease proof enamel. Will accommodate two No. 303 drawer units (see illustration). Our models 101, 100 or 106 may be mounted on this versatile unit.

Overall dimensions 18" x 27" x 33"

Shipped knocked down, one per carton, weight 54 lbs.

MODEL No. 201 HUOT PORTA CAB

Made of heavy-gauge steel reinforced, this Porta Cab is made to carry your tools to the job. Three large, deep free-sliding drawers. An extra storage space at the bottom. The Model 201 has one built-in lock that locks the HYDE-WAY front panel and all the drawers. When the Porta cab is open the HYDE-WAY panel is slipped back into the cabinet and cannot be misplaced or damaged. Model 201 comes standard with a "Flying Saucer" caster. This gives rollability of a 6" round caster and much moveability. Other casters are also available. Any HUOT tool chest will fit on the Model 201 Porta Cab. Overall dimensions are 18 x 26½ x 33.

One handle is furnished that can be mounted at either end for moving the Porta Cab.

Shipping weight 95 pounds.

THE BASSICK "FLYING SAUCER"

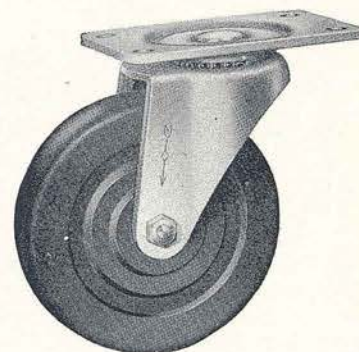

HUOT cabinets are now equipped with Bassick's AMAZING NEW "FLYING SAUCER" caster.

The very latest in caster design, The "Flying Saucer" caster gives the easy-rolling quality of a much larger caster.

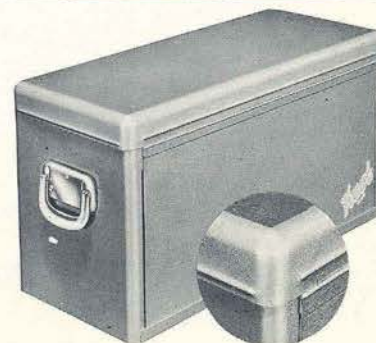

Because it rolls on a 3 in. saucer at a 45 degree angle, it fairly flies over obstacles and rough, littered floors. Easy to turn quickly in any direction with practically no danger of tipping.

Plate and saucer are made of heavy-gauge steel, formed and embossed for great strength. The saucer wheel is case hardened for long wear and resistance to abrasion.

The "Flying Saucer" caster is another one of the results of Huot's never-ending search for ways and means to keep bringing you the very finest and most efficient cabinets and tool chests.

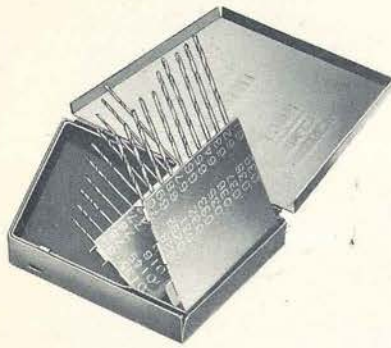

For those who prefer the regular type caster, Huot uses a heavy-duty Bassick bolt-on type. These casters cannot fall out or become loose and wobbly. They are built for many years of hard, rugged use.

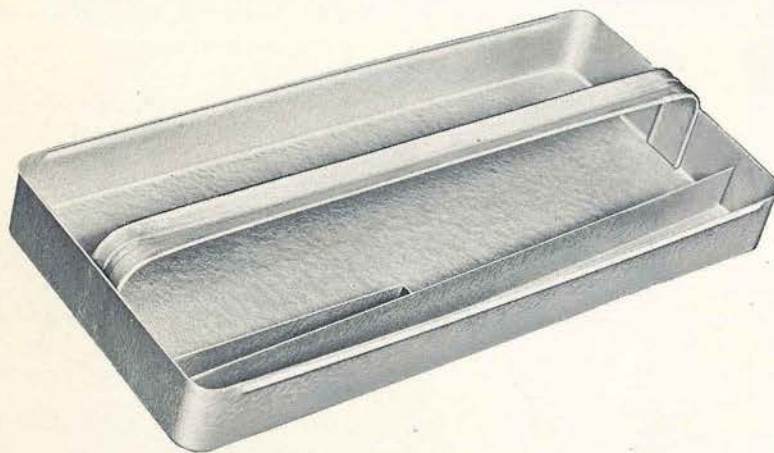

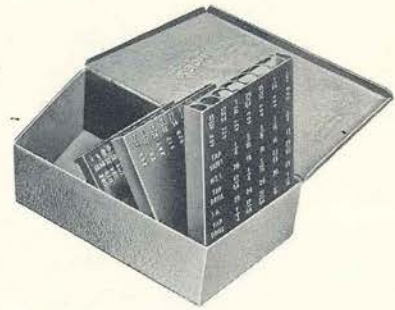

Huot's new cabinets now come with rounded corners. The rounded corners not only give a more modern, streamlined appearance, but are easier to clean, don't dent as easily, can't catch and tear clothing, and make a stronger cabinet.

HUOT DRILL INDEX

The Huot Drill Index is all steel — no die casts or cast iron parts. Index drill container panels fold into the heavy, steel box-like pages of a book. Drills are held firmly even when shortened by use. The Huot Drill Index eliminates the endless search for the right size drill. Just a flip of the wrist and the case is open and ready for use. Ideal for tool and die makers, mechanics, machinists, etc. All users of drills will want one of these indexes, it will pay for itself in a short time. More than 3,000,000 Huot Drill indexes are now in use all over the world. Made in 17 different sizes and models. Order your index today and end forever the irritating, endless search for the right drill.

Model 301 Tote Tray

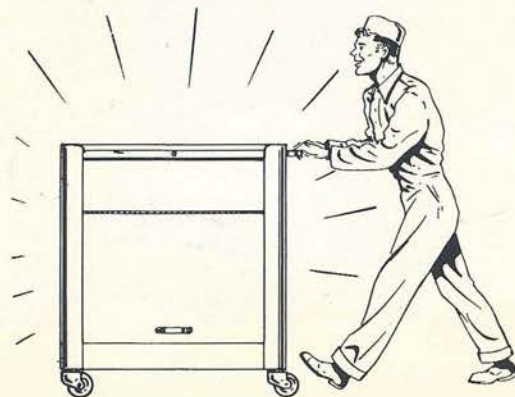

A heavy-duty tote tray designed for use in all Deluxe Chests. Can very readily be used by itself, has two compartments for socket wrench sets. Finished in grey hammerlin baked enamel. Easily cleaned. Overall dimensions 2 x 7½ x 18 in. Packed in carton of six.

"Tools on the move" has become a watchword in most modern shops and garages. Innumerable man hours can be lost in the many trips from the job to a stationary tool chest to get various necessary tools. In these days of high wages few people can afford such a loss.

Huot's Portable Tool Cabinets and Chests bring a complete selection of tools within arms length of any job. The proper tool is always instantly available so mechanics are not tempted to try to get along with "the next best thing" thus causing more delays and loss of time. The streamlined beauty of every Huot chest or cabinet is an asset to any shop and gives the appearance of order and efficiency. Huot chests and cabinets have been standard equipment in shops all over the country for many years. You can add to your profits by contacting your local dealer or writing direct to:
